

Recording as a service

Available to all meeting organizers

Capture and share all your significant milestones

Start and stop from your StarLeaf video endpoint

Record 

Easy to use schedule in one click

EVERYTHING YOU NEED TO KNOW

Encore recording is an enhancement to the OpenCloud conferencing service. Easy to initiate and available to all meeting organizers. Tight integration with StarLeaf hardware and software endpoints allows a recording to be activated from the StarLeaf Touch controller. In the same way recording can be interrupted and resumed during a meeting, in one button press.

Highlights for your business

- Recording cloud service that needs no additional equipment or infrastructure
- Flexible and easy way to record and share meetings with absent colleagues, customers, and partners
- Maximizes training sessions, product demonstrations, corporate news, and much more
