

Fast system provisioning

Simple installation

Remote management of meeting room systems

Improved meeting room efficiency

System health and status monitoring

Scheduling of software updates

EVERYTHING YOU NEED TO KNOW

StarLeaf Maestro is the StarLeaf management platform for the GTm family of native Skype for Business room systems. It allows room administrators to manage small or large deployments of GTm room systems from a single location and provides a dashboard overview as well as a simple intuitive interface to manage multiple devices remotely. StarLeaf Maestro is available as on premise solution either as a VM, as a dedicated appliance, or hosted as part of the StarLeaf cloud solution.

Highlights for your business

- Quicker system provisioning and reduced installation time
- Remote management of meeting room systems
- Reduced system downtime
- Improved meeting room efficiency

@ a Glance

- Enables simple installation and configuration of newly deployed systems
- Clone an existing device's settings for easy replacement
- Simple system provisioning with StarLeaf QuickConnect
- Manage device settings for remote units
